is

Organizing a One-Day International Conference

on

Indian Knowledge System and Sustainable

Development Model for Viksit Bharat:

Uniqueness, Challenges, and Opportunities

(In Hybrid Mode)

1st November, 2025

Vision & Rationale

The 21st century presents a complex tapestry of interconnected challenges and opportunities. Issues such as digital transformation, environmental sustainability, socio-political shifts, and economic reconfiguration do not exist in silos; they demand a convergent, multi-disciplinary approach to understanding and solving them. This international conference aims to break down traditional academic barriers by fostering a dialogue across the disciplines of English, Hindi, Political Science, Economics, History, Social Work, and Commerce. By bringing together Master's students, research scholars, and faculty, the conference seeks to create a vibrant intellectual space for sharing innovative research, critiquing existing paradigms, and building new frameworks relevant to our contemporary global and local realities.

Objectives of the conference

To provide a platform for emerging and established scholars to present interdisciplinary research. To stimulate critical thinking and discourse on pressing contemporary issues. To encourage collaboration across diverse academic fields. To publish high-quality research in an ISSN-registered edited volume, contributing meaningfully to academic literature.

Outcome:

Selected high-quality papers presented at the conference will be published in an edited book with an ISBN, subject to a blind peer-review process.
